

# OVERALLS IN OTANIEMI

The presentations of the overalls are copied from the Freshman Guide 2014 of the Guild for Bioinformation Technology Inkubio.

---

**Guild of Architecture AK** uses broken white overalls. The picture on the back changes every year as each class designs the picture by themselves.

**Guild of Automation and Systems Technology AS** overalls are bright purple with black sleeves to indicate that AS once resigned from TiK.

**Guild of Information Networks Athene** wears olive green overalls with a black sleeve, also to indicate the resignation from TiK.

**Guild of Physics FK** uses off-white overalls. There is a big Fi letter on the back, which is every other year black on a white background or white on a black background.

**Guild of Civil Engineers IK** wears blue overalls similar to actual construction worker coveralls. The colour of the left sleeve depends on one's studies. Members sew the patch of their guild on the left epaulette.

**Guild of Bioinformation Technology Inkubio** overalls are red-brown due to a historic misspelling. The overall legs have white patches as a sign of the resignation from SIK. Each member sews their patches by themselves.

**Chemistry Guild KK** is the oldest guild in Otaniemi. The overalls are chemist red and there is a neon atom on the back and the text "Saa juottaa", the font of which changes annually.

**Guild of Mechanical Engineers KIK** wears extremely manly pink. In addition to the colour, another bizarre aspect is the huge back pocket.

**Guild of Surveying Engineering MK** wears matt black overalls with magenta-coloured sleeves. After the Chemistry Guild, MK is the second oldest guild in Otaniemi and the members don't like it if they are confused with TiK. So remember that there is a difference between matt and glossy black!

**Forest Products Technology Guild PJK** bright yellow overalls stand out in the crowd. The logo of the guild is on the back and on the thigh you can check when students have begun their studies.

**Prosessiteekkarit PT**, newcomers in Otaniemi wear blue overalls. On the left sleeve, there is a red-blue-yellow stripe to remind about the old guilds of the school.

**Industrial Engineering and Management Guild Prodeko** overalls are also white but they stand out with their fine rainbow stripes. Each class was at least supposed to have stripes of different colours in different locations.

**Guild of Electrical Engineering SIK** wears clean white overalls. The unofficial light bulb logo of the guild is on the back. On the right leg pocket, there is a printed telegram.

**Teknologföreningen TF** is a student nation of Swedish-speaking students but all

who feel like it can join the student nation. They wear technology red overalls with a yellow logo on the back. Many members change parts of the overalls of their own guild to these overalls.

**Computer Science Guild TiK** is the guild of information technology students who wear shiny black overalls. The guild logo similar to @ symbol is on the back.

**Guild of Mining and Metallurgy Students VK** wears beer crate blue and their logo is a diamond drill bit.
